### ABOUT PROJECT

In the Recent times a lot of money is being wasted in the car insurance business due to leakage claims. Claims leakage Underwriting leakage is characterized as the discrepancy between the actual payment of claims made and the sum that should have been paid if all of the industry's leading practices were applied. Visual examination and testing have been used to may these results. However, they impose delays in the processing of claims. Here we try to auto mate the procedure. Using this automation, we can avoid time conception for the insurance claim parties.

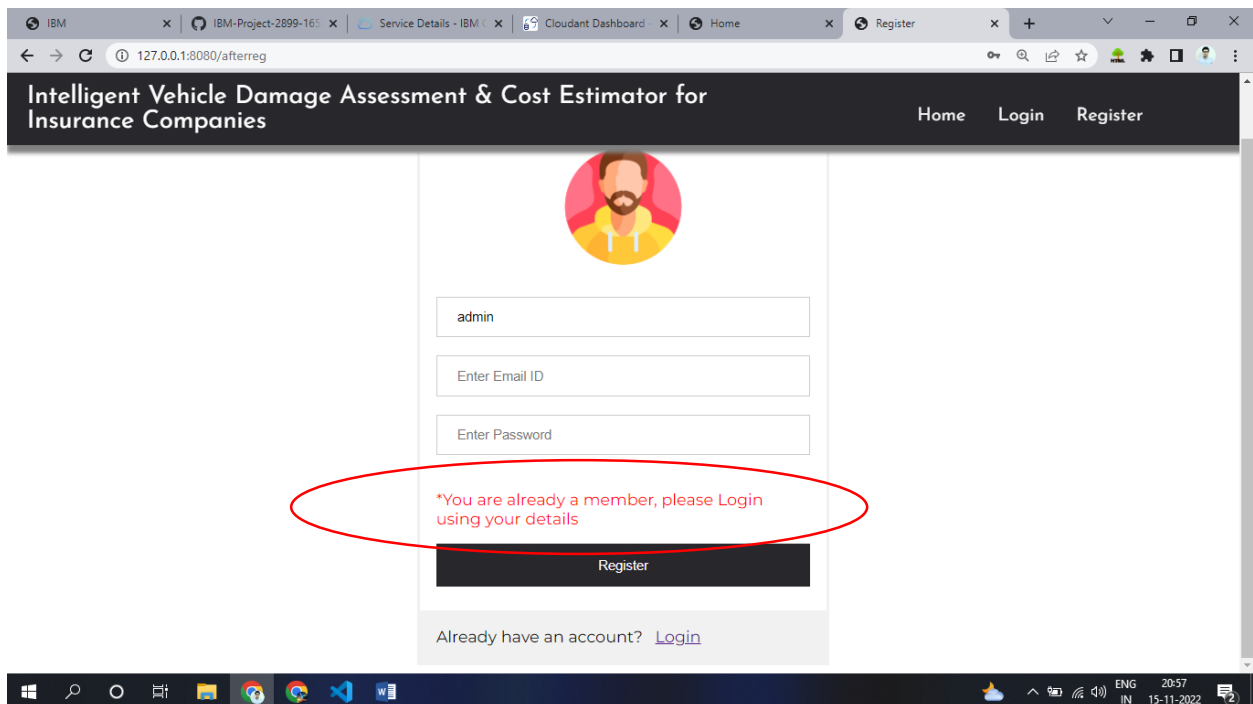

## Registration Page – New user

The screenshot shows a web browser window with the URL `127.0.0.1:8080/register`. The page title is "Intelligent Vehicle Damage Assessment & Cost Estimator for Insurance Companies". The navigation bar includes "Home", "Login", and "Register" links. The registration form contains a profile picture placeholder, three input fields (username: "admin", email: "adminmit@gmail.com", password: masked with "...."), a "Register" button, and a link "Already have an account? [Login](#)".

\*\*After success, the user will be directed to prediction page.

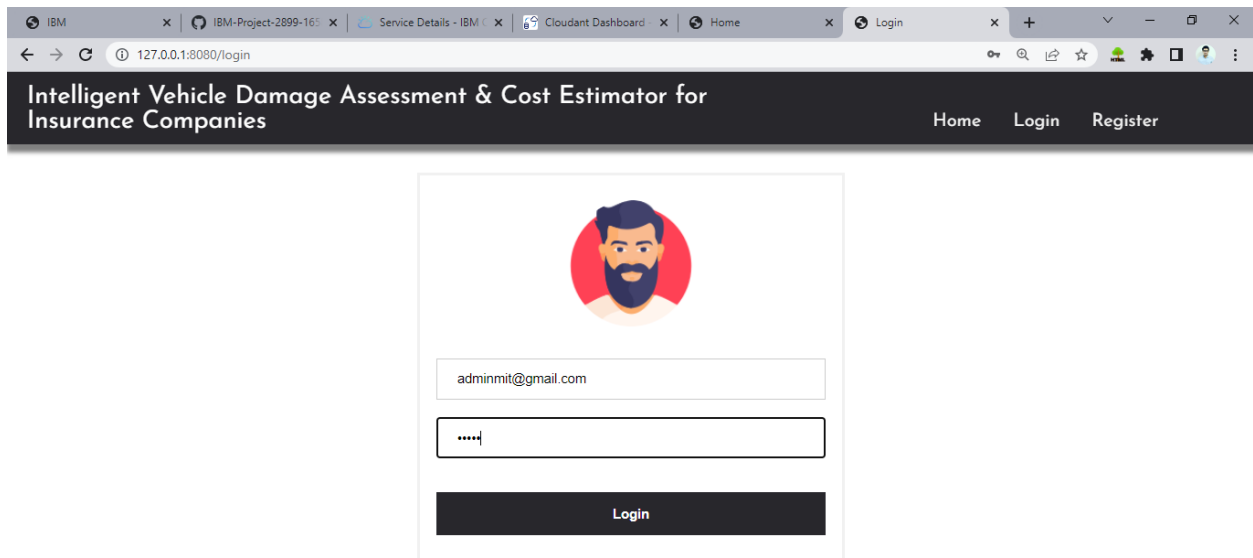

## Registration Page – Existing User

The screenshot shows the same registration page but with the URL `127.0.0.1:8080/afterreg`. The form fields are "admin", "Enter Email ID", and "Enter Password". A red oval highlights the error message: "\*You are already a member, please Login using your details". The "Register" button and the "Login" link are still present.

\*\*Intimates the user exists already.

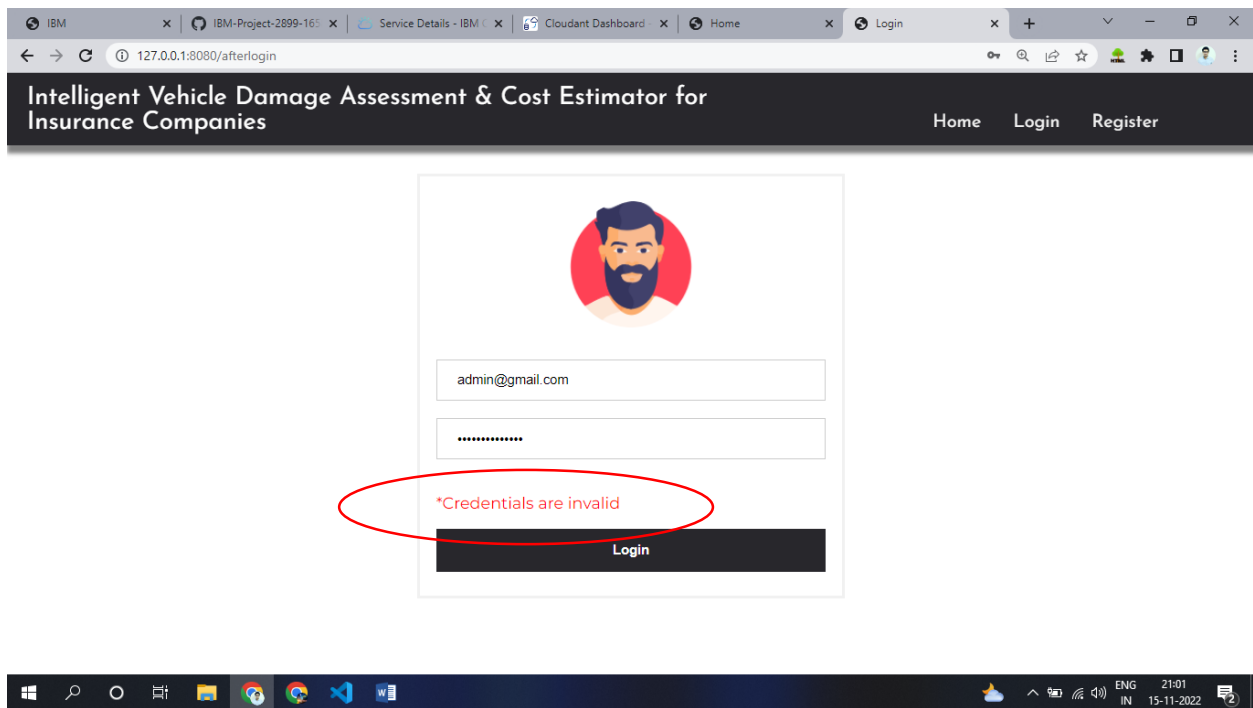

## Login Page – Correct Credentials

The screenshot shows a web browser window with the URL `127.0.0.1:8080/login`. The page title is "Intelligent Vehicle Damage Assessment & Cost Estimator for Insurance Companies". The navigation bar includes "Home", "Login", and "Register". The login form features a user profile icon, a text input field containing "adminmit@gmail.com", a password input field with masked characters "\*\*\*\*\*", and a "Login" button.

\*\*Successful login and will be directed to prediction page.

## Login Page – Incorrect Credentials

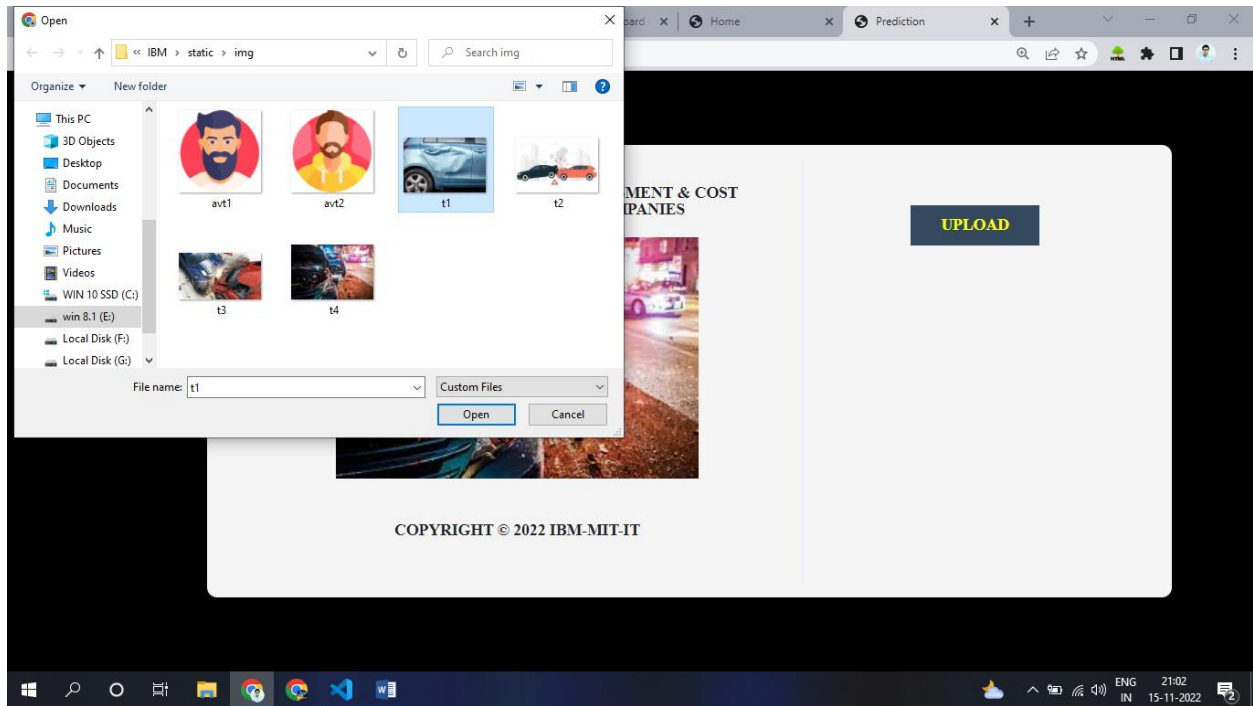

The screenshot shows the same login page, but the URL is `127.0.0.1:8080/afterlogin`. The text input field contains "admin@gmail.com" and the password field is masked with "\*\*\*\*\*". A red oval highlights the error message "\*Credentials are invalid" displayed below the password field. The "Login" button is still visible.

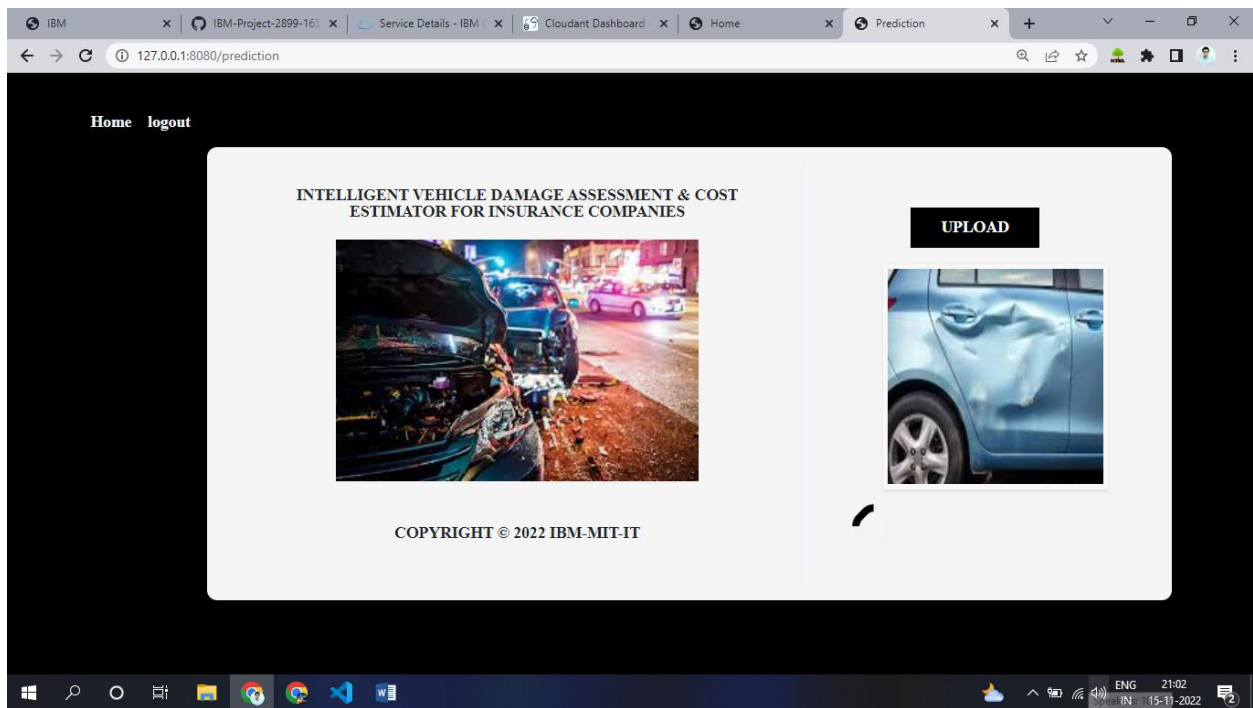

\*\*Intimates the credentials are bad.
